CERTIFICATE

Timo Kauppinen

Has successfully completed the Functional Safety Certification Program requirements for

Functional Safety Engineer

In accordance with IEC 61508:2010

Date issued: 02-October-2025 ID number: TS25050653

Field: Functional Safety Industry Subject: Safety-Related Systems

gur 31

Dr. Michel Houtermans

Trainer

G. Greil Certifier

CURRICULUM

Functional safety management:

Life cycle concept, documentation requirements, verification, validation, assessments and audits, modifications

Hazard & Risk Analysis:

Hazard identification, hazard analysis, risk reduction, safety function definition using FMECA, FTA, ETA, LOPA, risk matrix, risk graph

Planning the safety system:

Planning for end users, integrators, and realization of safety systems, safety plan, verification plan, validation plan, safety requirement specification, requirements for suppliers, FAT, SAT

Hardware design:

Hardware lifecycle, energize vs de-energize, low demand, high demand, demand mode, continuous mode, redundancy, diversity, voting, hardware fault tolerance, safe failure fraction, type A/B, architectural constraints, proof testing, diagnostic tests, measures to avoid and control failures, compliant items, compliance routes

Hardware reliability:

Reliability modeling, FMEDA, simplified equations, block diagrams, FTA, Markov, failure data, HFT, SFF, DC, CCF, SIL, PFH, PFD

Software design:

Software lifecycle, embedded software, application software, utility software, fixed programming languages, limited variability languages, full variability languages, software architecture, V-model, measures to avoid failures, compliance routes

Operation and maintenance:

Installation and commissioning, safety validation, operation, maintenance and repair, modification and retrofit, maintenance override

Experience:

The holder of this certificate has more than 6 years experience in more than 2 functional safety projects
