# CERTIFICATE

# Joseira Carolina Laya Salazar

Has successfully completed the Functional Safety Certification Program requirements for

# Functional Safety Engineer

In accordance with IEC 61511:2016

Date issued: 18-June-2025

ID number: TP25051956

Field: Process Industry

Subject: Safety Instrumented Systems

Gut I

G. Greil Certifier Ricardo A. Vittoni Trainer

# CURRICULUM

### Functional safety management:

Life cycle concept, documentation requirements, verification, validation, assessments and audits, modifications

### Hazard & Risk Analysis:

Hazard identification, hazard analysis, risk reduction, safety function definition using FTA, HAZOP, LOPA, Risk matrix, risk graph

#### Planning the safety system:

Planning for end users, integrators, and realization of safety systems, safety plan, verification plan, validation plan, safety requirement specification, requirements for suppliers, FAT, SAT

# Hardware design:

Hardware lifecycle, energize vs de-energize, low demand, high demand, demand mode, continuous mode, redundancy, diversity, voting, hardware fault tolerance, safe failure fraction, type A/B, architectural constraints, proof testing, diagnostic tests, measures to avoid and control failures

#### Hardware reliability:

Reliability modeling, FMEDA, simplified equations, block diagrams, FTA, Markov, failure data, HFT, SFF, DC, CCF, SIL, PFH, PFD

# · Software design:

Software lifecycle, embedded software, application software, utility software, fixed programming languages, limited variability languages, full variability languages, software architecture, V-model, measures to avoid failures

# Operation and maintenance:

Installation and commissioning, safety validation, operation, maintenance and repair, modification and retrofit, maintenance override
